Subject: The DOJ should have broke up Microsoft.

Dear DOJ,

The DOJ should have broken up Microsoft instead of making any deal. Microsoft controls (with a iron fist) over 90% of the market of OS for computers.

Microsoft has copied every OS its every made (but DOS) from Apple. The only thing different from Mac OS X and Windows XP is the P! Microsoft has many times try to kill java if fact it's not even in its new OS XP.

It almost killed Netscape well basically did because AOL who own's Netscape cant even use its own browser they use Microsoft's browser. Microsoft is a Trust, Monopoly and down right a bully.

I sorry to say this but Microsoft has broken deals with the DOJ before and you all have been fools to trust them. Bill Gates (Microsoft) is Laughing at the DOJ with his 50 billion dollars thinking his more powerful than the United States Department of Justice, because he and Microsoft has gotten away with being a Monopoly that rules with a iron fist. And all it got was a slap no... a little tap on the hand.

Come on now what where you all thinking making a deal with the devil like that?

Break'um up

David Messick
